

Introduction

Welcome to the \$300 CPA Every Day course. I would like to thank you for your making the small investment to find out about this genuine money making method which is helping a lot of people make their first few hundred bucks online.

What is contained in this detailed course has the immense power to take you into the highest realms of online earnings and financial freedom.

Now, a little bit of background on the topic. After searching around online for many weeks and months, I realised there wasn't many 'free' methods of sending traffic to earn easy quick commissions from CPA offers (Cost-Per-Action), so I decided to dive into the social networks a little and found a few of these had huge potential to make a lot of money, especially in the mobile department.

I have a few other methods in my arsenal which I aim to let you guys know about in the future, but for now I would like to show you a method I have been using which involves the photo sharing social network that is 'Instagram'.

Now, the method we will discuss today is something I haven't seen much debate about online, I suspect due to the nature of how much money can be made, the experts are keeping it to themselves! In short, the method involves sending traffic (customers/people) to a CPA (cost per

action) offer where the user will either purchase something or input some basic details and you will earn a commission.

You are about to discover in immense detail, how we make a bunch of crazy cash using this underground affiliate marketing method.

There is no fluff here. This is 100% legit information we are passing onto you for a few dollars.

The great thing about all this, is that its 100% free to do and set up. There are some paid aspects if you wish to ramp things up, however they are not essential to get going with this method.

Making money online will never be this easy.

Get ready for the ride.

Welcome to the underground world of CPA marketing and Instagram.

Tools You Will Need

Before get into the nuts and bolts of the course, there are a few basic tools you will need to ensure everything runs smoothly.

Firstly you will need a website/hosting account. This is so that you can landing pages somewhere online.

Secondly you will need a Leadpages account so that you can create your landing pages.

And thirdly you will need an auto responder account so you can start to build a list. You can sign up for either Aweber or Getresponse.

Background on Instagram & Getting Started

Instagram is a fun filled mobile based app which allows users to share photos online of many things such as things they are doing on a daily basis, things to do with their family and friends, sporting events and such like.

A distinctive feature is that it confines photos to a square shape, similar to Kodak Instamatic and Polaroid images, in contrast to the 4:3 aspect ratio typically used by mobile

device cameras. Users can also apply digital filters to their images. The maximum duration for Instagram videos is 15 seconds.

Like most other social networks, Instagram allows the user to share photos with either their friends or share them publicly so everyone on the internet can see them, which is fantastic if you wish to follow celebrities and sports stars. Other users are allowed to leave 'comments' and also leave 'likes' on photos they like.

Whilst the majority of people are using Instagram for pleasure and to share photos, there is also a small amount of users that are utilising Instagram to make money through CPA marketing or affiliate marketing. This is because Instagram is great to generate **FREE TRAFFIC** to CPA or affiliate offers and when you drive this **FREE TRAFFIC** to the right offers then you are set to create your own money pot that runs completely on autopilot.

The best thing about this, is that you can set it up as many times as you wish.

The possibilities are limitless.

Now before we get any further into this guide, I would like you to do a couple of things.

Firstly I would like you to make notes of everything I am detailing in this course so you don't forget things. If you don't make notes, please do the steps as we go along, and if

you are watching the video course, remember you can watch the videos over and over again.

Secondly, I would like you to write down how much money you would realistically like to make per month. Once we have those figures down, we can then go and find affiliate offers that will match the kind of figures you wish to achieve on a daily basis.

For example if you want to make \$10 per day, we could either target affiliate offers of anything from a dollar up to \$10 per signup/submit/cpa. If you wanted to make \$300+ per day, we would target different offers and slightly different methods.

Once you have your goals laid out in front of you, everything else becomes clearer and easier to go forward with. If you wanted to make \$10 per day, then is extremely achievable with these methods and would add up to \$300 per month which would be a fantastic side income.

By starting small and building on the success you achieve from Instagram, then you are more likely to succeed than if you jumped in the deep end trying to earn those very high commissions from day one. However, as the title of the product suggest, \$300 days are extremely achievable, and more!

The way I see the money you could potentially earn from Instagram, is that you could use this money to re-invest into other ways to make money online, or use it to ramp up

your Instagram methods. The choice is yours, once it's working for you.

How To Get Accepted Into CPA Networks

In general the process is extremely simple however some CPA networks require you to provide some additional information before they allow you to promote their offers.

Before we get any further, if you don't want any hassle it might be best to promote offers where there isn't any approval needed.

Networks that I would suggest are:

<http://www.clicksure.com>

<http://www.clickbank.com>

They aren't traditional CPA networks, but they do have great affiliate offers hosted on the networks. Clicksure have some very high paying offers if you are intending on promoting high-ticket offers.

Other networks you could use for traditional CPA offers would be:

<http://www.adworkmedia.com>

<http://www.maxbounty.com>

<http://www.peerfly.com>

But there are thousands out there so try them all. There is also a couple of good sites you can use to search from CPA offers. Just type in a theme or an offer into these sites and they will show you the best networks that are hosting those offers. You can then apply to those networks and promote offers.

Try these sites to compare and find offers to promote:

<http://www.affplus.com>

<http://www.offervault.com>

Now, with regards to getting accepted into some of the bigger CPA networks, it can be slightly tricky so here is a basic guide.

1. Get a domain and hosting. This is the number one thing you're going to need if you want to show that you're a serious internet marketer to the CPA companies. I recommend either HostGator or **THIS LINK**. Set up a basic site and it makes you look a lot more professional. Make sure your domain looks pretty serious, so for examples - **ALEXJAMESMARKETING.COM**

2. Get an email address for your domain. This is simple and free. If you go into your hosting account you can usually make unlimited email accounts.

An example of a good email address could be **HELP@ALEXJAMESMARKETING.COM**

3. Goto Wordpress. Learn it, it's your best friend. It's a simple script that most hosts have automatic installs for as well. What we're going to do is build a quick, five-minute website!

4. Either make your site look like a general marketing company website or make it look like you have a huge interest in the topic you wish to promote, so for example if you wish to promote diet pills or something to do with health, it may be a good idea to create your site so it looks like you are a health agency or work within that industry.

5. After you've decided on your niche and created the site, just scour the Internet for some articles related to said niche. Start posting some content if your site has been created related to the niche. If you have set up the site so it looks like you are a general marketing agency, just keep it legit, straight and serious. Fill in a few pages about how your company could improve other companies marketing activities; bring more sales to their company etc.

6. Now that you have a website, it's time to start applying for CPA companies! Try the ones I suggested above.

7. Once you have applied to some CPA companies or networks, they may wish to speak with you, to verify you are a legit person. The website you have created will help, but they still may phone you or wish for you to jump on a

Skype call for a brief chat. If they do, here are some basic questions and answers you may wish to remember, incase they call.

Q:How many uniques a month do you get?

A:20000-100000

Q:How do you get traffic?

A:I use Facebook ads, PPC via google/bing and also have an email list I am building.

Q:How long have you been doing Internet Marketing?

A:Roughly a year.

Q:What has worked for you in the past?

A:Mainly Facebook ads and some free traffic which I then build a list from.

Q:What vertical/category/kind of offer you want to promote, or have promoted in the past?

A:Anything that converts, I've done gaming, freebies, health, ringtones, email submit, etc..

Q:Do you offer incentives?

A:NO

Q:How much do you spend on advertising?

A:200\$ per day

Q:Do you work with other network, which ones?

A:YES, name any that you have been accepted at or name any random ones.

Q:How did you hear about us?

A:I googled for the best CPA networks, and your name showed up :-)

That is a general guide of questions you may be asked, but

think outside the box with the answers as I'm sure the affiliate managers will have heard all these before.

The affiliate network will either send you an email to say you have been accepted OR they will contact you to set up a time for a phone/Skype call.

If you have any further questions or get stuck at this part, just drop me a email or message, I will help you out and may be able to speak to the CPA network too.

Choosing An Offer To Promote

Now this is where things start to get interesting. Before we get onto Instagram its important we have entrance into some CPA networks and have chosen a high converting offer we believe is the right fit to promote on Instagram.

Generally when it comes to the types of offers we can chose to promote on Instagram, the sky is the limit. We can actually promote anything from a free trial, a \$1 offer or even a \$300 trading/finance offer. Personally I have had success with all sorts of offers but for the sake of this guide I will show you the process of what to do with very low ticket offers.

Therefore the main offers we want to go and find will be 'one field email submit' offers.

One field email submit offers basically means when a user

submits their email address onto the offer you linking them to, you will get a commission of a few dollars, however the company behind the offer will then attempt to make more money from that lead in the future. Therefore they can afford to pay you the \$1 to send them the lead.

Now, with regards to one field email submit offers, we generally want to look out for offers that users are more likely to click on. A few examples would be gift cards, freebie/sweepstakes, electronics, gadgets, giveaways, lottery, downloads/installs, surveys/quiz, email/zip submits and the list goes on and on.

Most of these kind of low ticket offers will pay around \$1.00 per email submit. But please do not afraid, as once you have the system ramped up and on auto pilot you will be cashing in for fun!

To find offers to promote you will want to check out either <http://affplus.com> or <http://offervault.com>

You will want to tap in a keyword, hit submit and check some of the options on the page so you locate the email submit offers.

The screenshot shows the affplus website interface. At the top, there are navigation links for 'CPA Networks', 'Affiliate Offers', 'Industry News', and 'Add Network'. The affplus logo is on the left, and a search bar is in the center with 'All Networks' and a search button. Below the search bar, there are filters for 'Networks', 'Countries', 'Categories', and 'Allowed Traffic'. The main content area displays search results for 'Email/Zip Submits' with a table of offers.

Home > Search > All Offers > Email/Zip Submits X Clear All

Showing 1 - 30 of 1619 Results from 37 Networks

Default | New | Featured | Hot | Payout Range 0.02 - 56 | Results per page 30

Offer Name	Payout	Type	Category	Network
Sweepstakes Match - Email Submit NEW	\$1.60	Lead	E-mail & Zip Submits	PeerFly 4.93
Snappy Survey - Email Submit NEW	\$1.60	Lead	E-mail & Zip Submits	PeerFly 4.93
[WEB+WAP] K-pop Star Sexy Gallery /MY	\$2.10	CPA	Erotic Content	ClickDealer 4.99
Win Apple Watch [WEB+WAP] /FR	\$20.00	CPA	Email submit	ClickDealer 4.99
Win Electric Toothbrush [WEB+WAP] /SE	\$20.00	CPA	Email submit	ClickDealer 4.99
Win iPhone6 [WEB+WAP] /FR	\$20.00	CPA	Email submit	ClickDealer 4.99
Win iPhone6 [WEB+WAP] /NL	\$20.00	CPA	Email submit	ClickDealer 4.99
Win iPhone6 [WEB+WAP] /SE	\$20.00	CPA	Email submit	ClickDealer 4.99
Diabetes Supplies - Email Submit	\$1.60	Lead	E-mail & Zip Submits	PeerFly 4.93
Protein Powder - Email Submit	\$1.60	Lead	E-mail & Zip Submits	PeerFly 4.93
Cinco de Mayo - Email Submit	\$1.60	Lead	E-mail & Zip Submits	PeerFly 4.93

This is the type of landing page of the offer you want to be looking for.

In this case the user will tap one of the buttons then the next page is a email submit.

Tools & Tricks So We Can View Instagram On The Computer

We all know this whole process is not so simple if we were to do it direct from our mobile phones. Luckily there is some software we can download to either the PC or the MAC so we can use Instagram as if it was a mobile app, direct on our computer.

There are a few options, which include Mobizen and Airdroid, which effectively mirror what is the screen from your phone, onto your computer. This is extremely good as it allows you to control your phone from the screen of your mac/pc.

<https://www.mobizen.com>

<https://www.airdroid.com/>

There is also Bluestacks, however it is a little buggy. This app will launch Instagram from our computers as a stand alone app. If you can get it to work correctly it is fantastic, but it is not my favourite.

<http://www.bluestacks.com/>

However a similar piece of software on the market is called 'ARC Welder' which is an add-on for the Google Chrome browser, which again, allows us to use mobile phone apps on the computer as stand alone apps. Very useful and is

something I use all the time. If you have the video course I will be showing you how to use this correctly.

For now, here is a guide on how to use it

<http://www.idownloadblog.com/2015/04/05/run-android-apps-whatsapp-instagram-mac/>

In this guide I will be using the ARC Welder to view the Instagram APK from my MAC. So any screen shots or video content will be from that app.

Signing Up For Instagram & Setting Our Account

Now we are at the stage of signing up for Instagram and setting up our profile correctly.

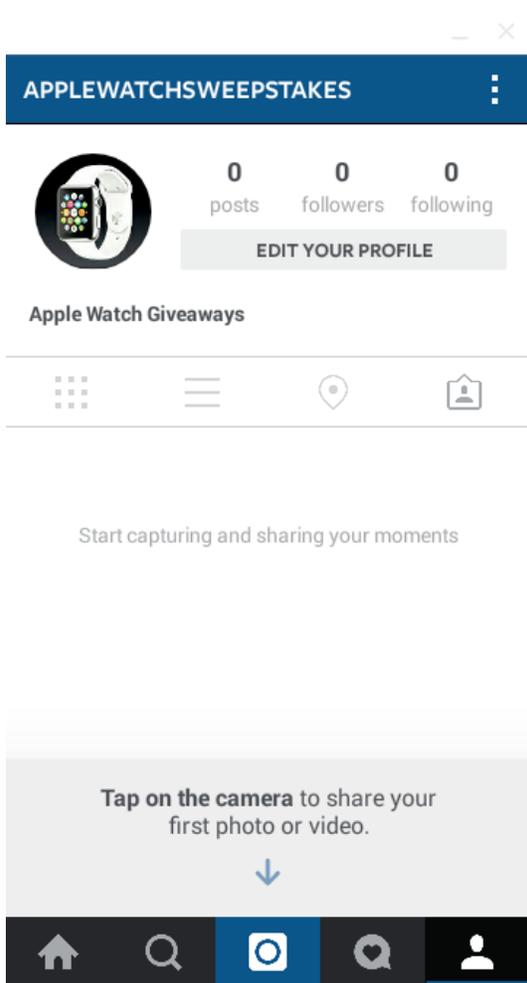

The first thing you want to do is sign up. Pretty self-explanatory, but we need to ensure the profile we are setting up will relate to the offers we are trying to promote. For example if we are going to target gamers and try to promote gaming offers, like freebies and competitions/surveys we really want to be setting up the profile so it matches what a gamer would want.

Firstly remember to use a legitimate email address, as you will need to verify the account, and remember to make a note of the email address/passwords and usernames you

use so you don't forget this important information.

For this example I'm going to show you how you would create an account based on the new Apple Watch, with our intentions to make some serious cash.

Once we have an email address we then want to think of a username. The username should reflect the theme of the CPA offer we wish to promote. In this instance, as I have said we wish to promote the Apple watch, i'll keep this simple here and make the account name 'applewatchsweepstakes'

As you can see from the image above, this is a brand new account where I have simply set the username of the account and the name on the account which appears on your page underneath the image you have selected for your profile picture, which leads me on to say, please remember to put an image as your profile picture that reflects the offer you are going to promote. So in this case, I have an image of an apple watch.

To find images to use for the profile pic, you can either head to google image search and find related image or you could use stock images if you are frightened of copyright etc. I would just suggest using either an image you took yourself or an image that is in the public domain to avoid copyright issues.

Head over to google and search in the image section for your keyword + stock photos royalty free.

Remember do not use any photos that are of nude people. Instagram will ban your account pretty quick if you are doing that kind of thing. Also don't use images of children.

Once we have our profile created and have a profile pic, we then want to head over to the 'Profile' department on Instagram to make some quick edits.

From this section we can edit the website, which will be our link to the CPA or affiliate offer we wish to promote. We

can also input some details into the 'bio' section which we use are a 'call to action' to get users and people to click on our link.

So in this instance, we are trying to promote an offer relating to the new release, Apple Watch.

In the bio we want to put something along the lines of "Tap The Link To Enter The Apple Watch Contest! 100% Free To Enter! Here is your chance to win the new Apple Watch! Click Below"

So basically the bio section is where you can pitch what you are selling/promoting. Another example for a different niche completely, would be a dating offer and your bio could say something like "Click The Link To Find The Top Five Weight Loss Tricks". Thus, you could be promoting a weight loss offer or such like.

One thing I must mention here is that some CPA networks will not allow you to use words in your bio such as 'FREE' or 'WINNER' etc, so please check with the CPA network before as they sometimes hold paying out if you have used such terms.

The Use Of Emoji's

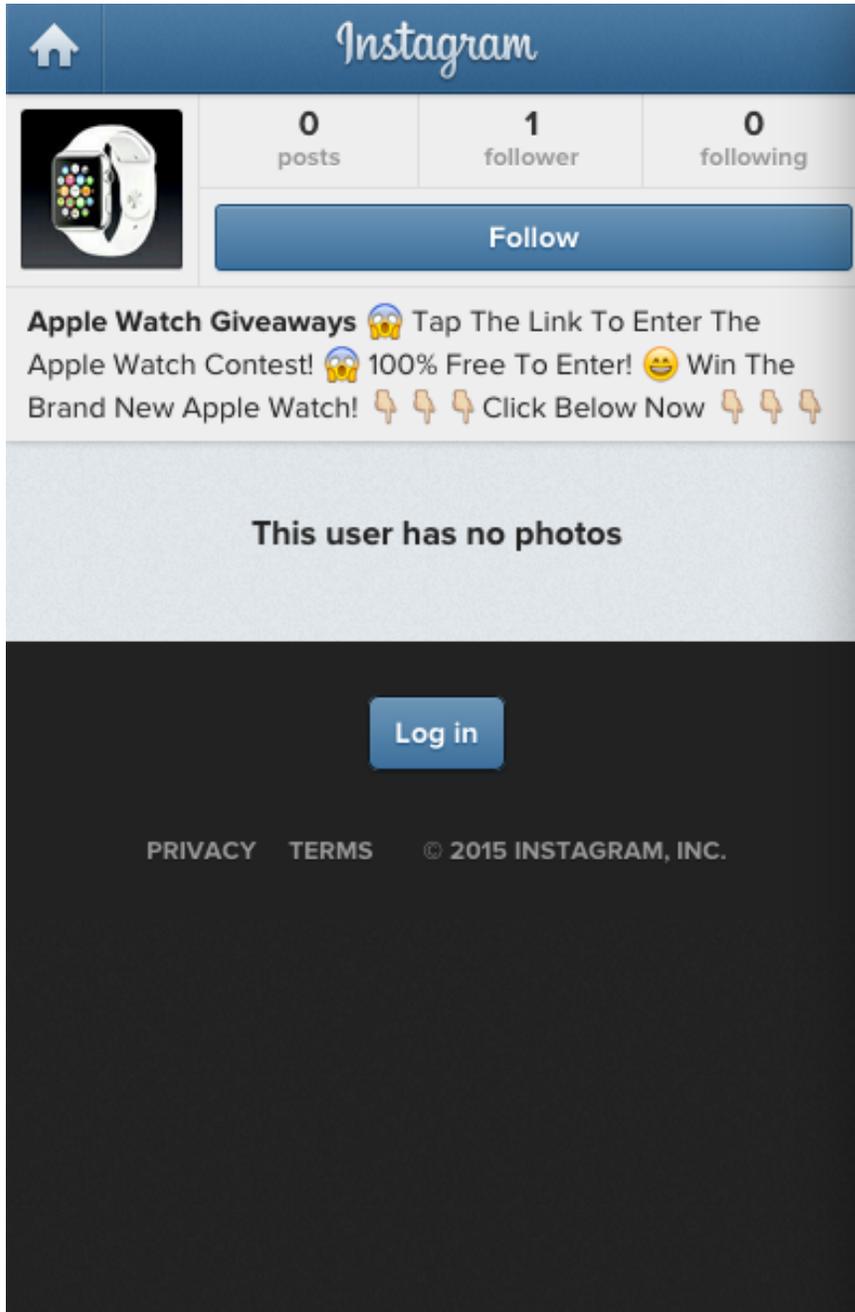

The use of the 'Emoji' on social media is becoming bigger and more popular by the day. The use of them on Instagram is a great way of getting your profile to stand out from the crowd.

Simply placing a few icons or emojis on the end of your profile name or bio can really help it to stand out.

Some examples of the Emojis you can use on Instagram are below

And here is a great example of how you could apply them to your profile and really make it look appealing within minutes.

The image above shows a clean example of how you could make use of emojis on your bio to make your profile stand out.

If you are working from a computer to run your accounts you could copy/past the emojis from this site:

<http://getemoji.com/>

If you work from the instagram app on your phone just select the emojis from the emoji menu.

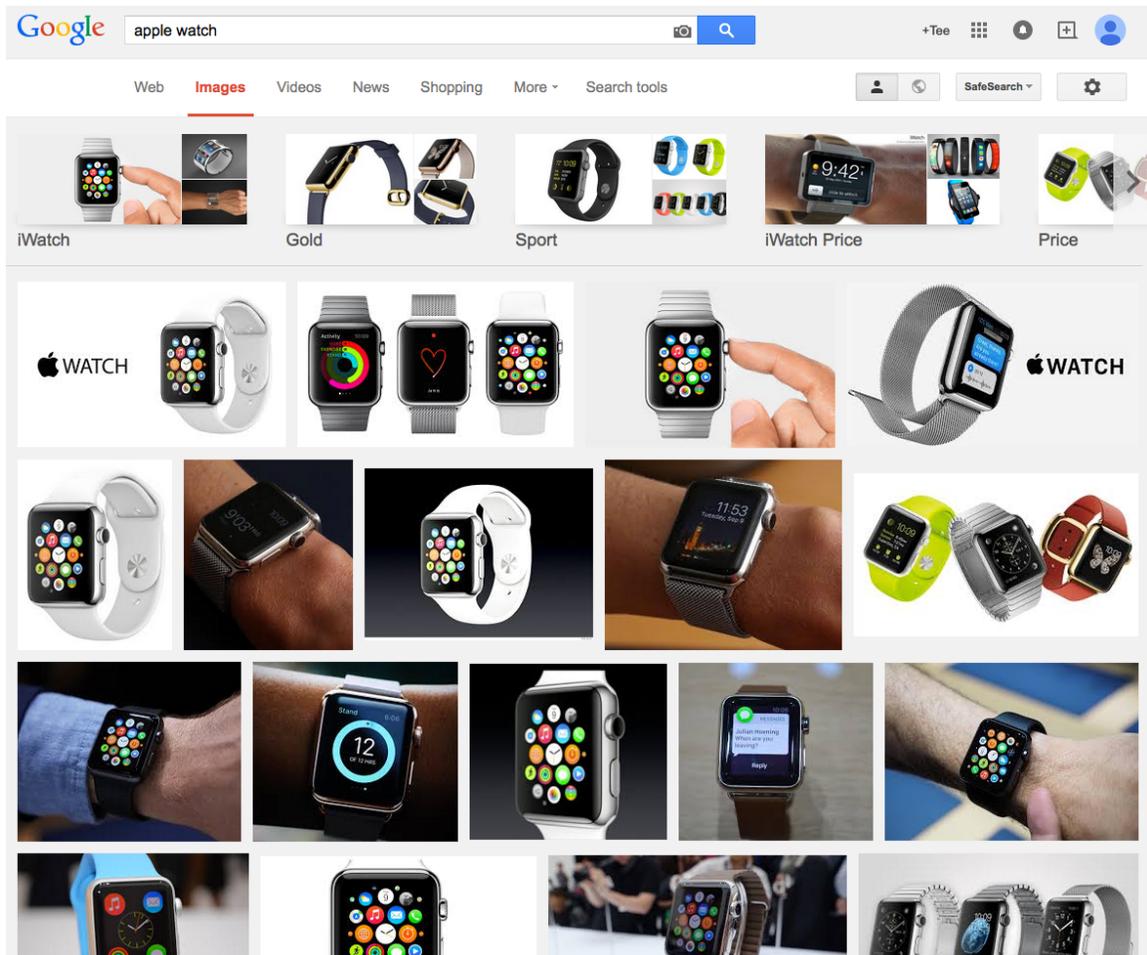

First Image Uploads To Your Account

Before you start doing anything else, you want your Instagram profile to look great. Nobody is going to follow an empty profile. If you want other people to follow you, the first thing you should do is upload about 5-10 really good photos. Make sure you don't post any photos that aren't good.

The first thing you need to do, is to head back over to google images or any other image search engine and find various photos relating to the topic you have decided to promote.

So for me, its apple watches, so I went to google and found roughly six images relating to Apple Watches.

The more photos you upload in the early days, the more credibility your account gets.

As you can see from the above screenshot, a very basic image search on google presents to me thousands of possible images I could share on Instagram. Again I must stress its pretty important to check the copyright, but for this example I'm just going to go ahead and chose a few here and hope for the best.

Now we need to start uploading our photos that we have saved to either our device or computer.

I highly recommend always images of the product or service you are trying to promote. This will help to catch the eye of potential clickers on Instagram.

Before we post our images we need to obtain a set of hash tags that we can put in the description along with our image. The reason behind this is, that you will find a lot of users search for images by hash tags, and if your image pops up alongside that hash tag, then you are going to get people 'liking' the photo thus potentially generally clicks on the link on your bio.

You should always utilize relevant hash tags when posting photos on Instagram. That way your photos will show up in the hash tag feeds, which is a good way to get your photos in front of more people. The keyword here is *relevant* since there's really no need to spam your posts with dozens of irrelevant hash tags (that will only make you look like a spammer).

In addition to this, you want to place a few hash tags that draw peoples attention to click 'like' and follow you. If you use the 'Tags For Likes' app you will be able to get a bunch of these that you can copy/paste onto the description of your photos, or into the comments section.

 FSLC (Follow/Shoutout/Like/Comm...

#fslc @TagsForLikes #followshoutoutlikecomment
#TagsForLikesFSLC #follow #shoutout #followme
#comment #TagsForLikes #f4f #s4s #l4l #c4c
#followback #shoutoutback #likeback
#commentback #love #instagood #photooftheday
#pleasefollow #pleaseshoutout #pleaselike
#pleasecomment #teamfslcback #fslcback
#follows #shoutouts #likes #comments #fslcalways

Copy Tags

With regards to the image related hash tags, you want to find some hash tags related to the offer or product you are trying to promote on Instagram. You could either think of hash tags relating to the topic you are promoting OR you could run along to one of these handy websites and copy a bunch of relevant hash tags. You will also find that some of these sites have apps too, so check the App Store and google play.

<http://tagsforlikes.com>

<http://hashtagify.me>

<http://top-hashtags.com/>

When you get to these websites you will need to enter your keyword, for example 'apple watch'

This will then bring up all the related hash tags I could use and the most popular tags people are using right now.

This is the result I got when I searched for apple watch:

#sellingmacbook #iphoneforsale #applewatch
#sellingiphone5s #instagram #business #cheapiphone
#paypal #cheap #macbookair #unlockediphone
#iphone6sale #macbook #legit #iphone6forsale
#sellingiphones #iphoneseller #sellingiphone6
#iphone5sforsale #unlocked #iphone6 #iphones
#iphone6plusforsale #appleiphone #sellingiphone6plus
#electronics #forsale #macbookpro #iphone6plus #htc

So, when we go to upload our first picture, we want to think of a catchy headline, and then paste in all these hashtags.

As you can see I bunched a mixture of hash tags, some were related to getting people to follow and like the photo and some were related to the topic of apple. While I was

putting those screenshots together we already managed to get a bunch of likes and follows!

Domain Name & Affiliate Link

We are the point where we need to fill in the ‘website’ part of our Instagram account. This is where we will be placing the link to our CPA offer we are attempting to promote.

So, firstly we need to find an offer to promote. Earlier in the guide we have gone over how we find offers to promote.

For the example on this guide I’m going to show you an offer to promote via one of the best CPA networks, which is Peerfly. Firstly I found this offer using the affplus.com site and then navigated to Peerfly to get the links I needed.

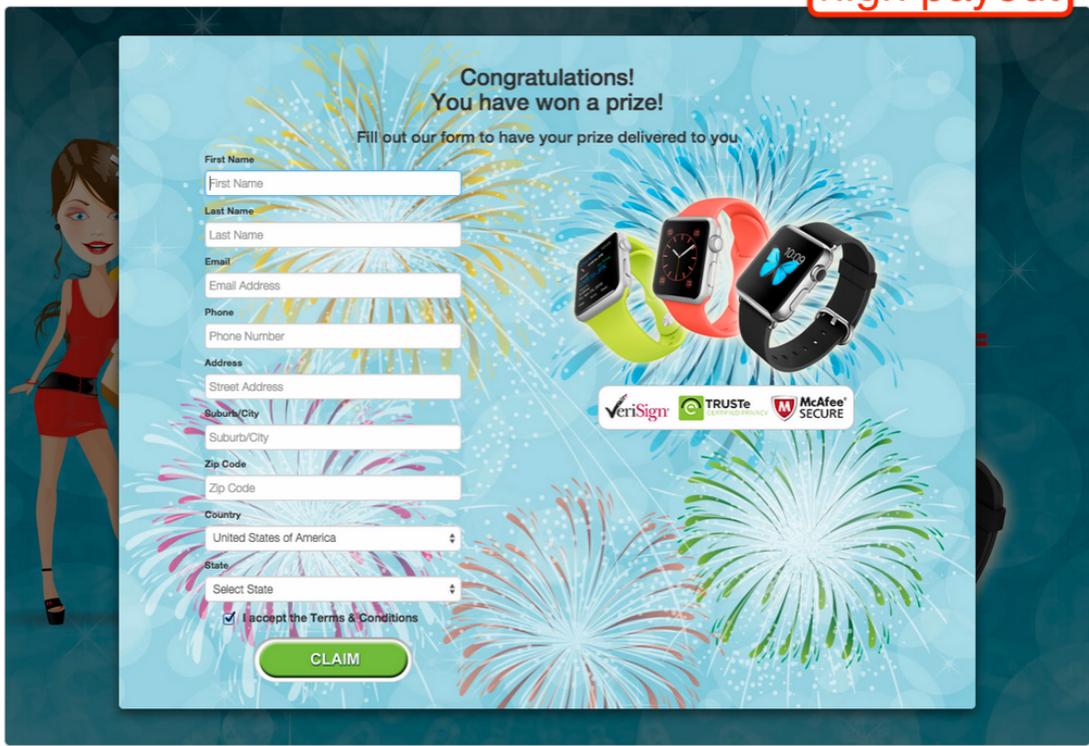

On the image displayed below, I have highlighted the payout amount that we will receive as a commission from the network if a user clicks on our link and ends up submitted the required information to enter the competition.

Win Bid Win - Win a FREE Apple Watch (Multi Geo) (19294) ⚡

Tools ▾

CLAIM

Now before we any further, we need to ‘mask’ our link as Instagram and similar social networks do not like CPA offers and do not like users direct linking to the offers. Therefore we need to mask the link, which basically means we will re-direct it from another domain name. To do this we need to purchase a domain name and hosting so we can set up the re-direct correctly.

To gain instant access to free hosting and domain accounts, click here to register with our preferred partners:

Hostgator -

Cool Handle -

Now to re-direct our affiliate link from our own domain, is a very simple process.

Once we have our own website/domain or hosting we need to login to Cpanel and click on ‘redirects’ under the ‘domains’ section, then you need to select one of the domains you own, past in the affiliate link then write where you wish for that link to be redirected from, for example...

My affiliate link - <http://trkur3.com/150955/19294>

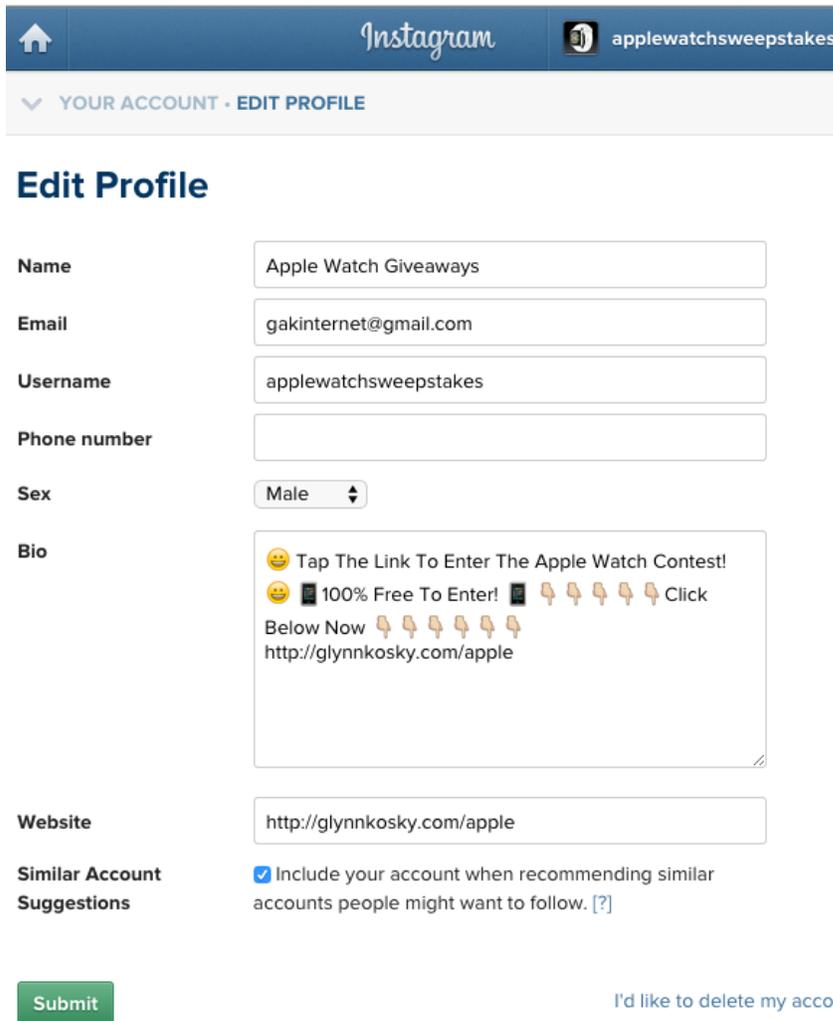

My re-direct - <http://glynnkosky.com/apple>

Therefore it now looks a lot cleaner and Instagram doesn’t believe you are re-directing to a CPA offer.

Usually you would want to purchase a domain name similar to the product you are trying to promote. In this case I am just using a domain name I already own.

If you purchased the video course, you will see my live going through these steps, which is a very basic process once you have done it once.

Now our profile is complete on Instagram, having added the URL to the Profile and to the Description.

The screenshot shows the Instagram 'Edit Profile' interface. At the top, there is a navigation bar with a home icon, the Instagram logo, and the account name 'applewatchsweepstakes'. Below this is a dropdown menu for 'YOUR ACCOUNT · EDIT PROFILE'. The main section is titled 'Edit Profile' and contains several input fields and options:

- Name:** Apple Watch Giveaways
- Email:** gakinternet@gmail.com
- Username:** applewatchsweepstakes
- Phone number:** (empty field)
- Sex:** Male (dropdown menu)
- Bio:** A text area containing the following content:
😊 Tap The Link To Enter The Apple Watch Contest!
😊 📱 100% Free To Enter! 📱 🍷 🍷 🍷 🍷 🍷 Click
Below Now 🍷 🍷 🍷 🍷 🍷
<http://glynnkosky.com/apple>
- Website:** <http://glynnkosky.com/apple>
- Similar Account Suggestions:** Include your account when recommending similar accounts people might want to follow. [?]

At the bottom left, there is a green 'Submit' button. At the bottom right, there is a link that says 'I'd like to delete my accou'.

You must remember to include all relevant hashtags to the CPA offer you are attempting to promote and also include some of the hostages that encourages other users to like your photo and follow your account.

Remember the more like and follows your account has, the more chances you will get clicks on your link to the CPA offer you are trying to promote.

Scheduling Instagram Posts

Remember we have said you need to upload a reasonable amount of photos per day. This is pretty easy but there are tools out there that can save you time, effort and energy!

Instagram was designed primarily as a mobile tool, so that's where most interactions take place. Instagram wants users to capture events as they happen. While real-time posting is the best-case scenario, it doesn't work for everyone at all times. If you're using the native version of Instagram on a desktop, you can view Instagram content and interact with people you're following, but you can't upload anything. While there are a few options available to upload photos and videos from a computer, none of these lets you schedule your content.

Luckily, there are some tools for scheduling your Instagram content. Some are mobile-only, others are computer-only

and a couple of them do both. Remember, scheduling or automating posts to your Instagram channel should not be the primary way you keep your Instagram channel updated. It should be part of your strategy for those times when you know you'll be unavailable.

The available scheduling tools include:

SheduGram

<http://schedugr.am/>

Latergramme

<http://www.latergram.me/>

Onlypult

<https://onlypult.com/>

TakeOff

<http://gettakeoff.com/>

Free Traffic To Your Instagram/CPA Offer Link

Ok, by this point we should have our Instagram account fully set up, the profile looking good, a few photos uploaded and more importantly the link to the CPA offer on the profile, which has been masked.

We now need to try to drive some serious traffic to that link.

There are various methods we can use to drive traffic to your account and your links. There are free methods and methods that cost a small fee.

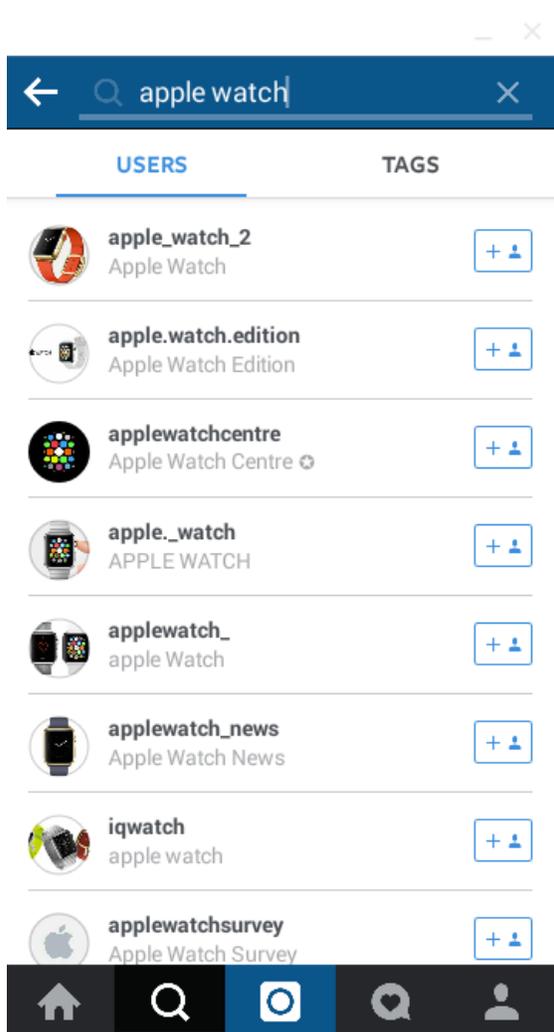

Besides hash tags, one of the easiest ways to get in front of other people and to get that free traffic is to simply start following a lot of people. Just find someone with photos that are similar to yours, and start following the followers of that person. They will get a notification saying that you are now following them, and many of them will check out your profile.

The free method is quite a long and drawn out process, which can take quite a while per day, however it's quite straight forward. What you need to do is search for people and accounts that you believe would potentially be attracted to your offer and follow these people. Once you have followed these people you then want to go onto their photos and like some of their photos and maybe even leave

a few comments here and there. What that will do in return is, those people will probably end up following you and they may actually click on your link. Well a lot of these people will click in your link actually.

To find these people, you need to click on the Spyclass icon, which brings up the search tool and you need to click on 'people'.

In my case I am searching for people who like apple products, giveaways and apple watches, that kind of thing.

As you can see from the screenshot there is going to be a bunch of people you can follow, potentially thousands. Just click on 'Plus' sign to follow them and also try to follow some of the followers of those accounts. This will help build your account up quickly.

If you just follow somebody and don't like or comment on any of their photos, you're a *ghost follower*. Instagram users generally don't like ghost followers because scam artists use this strategy to promote their fake profiles. You'll get better results if you also comment on the photos of the people you start following. That way they'll know you're a real person.

If following many other people is too impractical, you can also get a lot of exposure by leaving meaningful comments on the photos of other people. When you leave a thoughtful and positive comment, there's a good chance that the author of that photo will become curious to check out your profile. And if your profile is good, you'll get a new follower.

Remember, if you want to continue this free traffic to your profile, you must comment and post regularly. Try to post at least one new photo every six hours, whilst commenting on other photos more regularly throughout the day.

Automated Paid Traffic To Your Instagram/CPA Offer Link

To speed the whole process of getting followers, like and therefore clicks on your offer, we can use automated tools to build up the Instagram account.

These automatic methods do exactly the same thing and process I have detailed above, but much quicker and once you have set up the system to do it's magic you can leave it alone.

The tool we use for this automated traffic is called Instagress.

According to the people behind the tool, they claim "Instagress is designed to attract attention to your Instagram account and gain more comments, likes, and followers.

When we started Instagress, we built it around our personal needs. We want to get more Instagram followers without spending a lot of time on it! And we've developed some tools to make this process as simple and effective as possible.

Of course you can buy followers, but they won't be real! This way is good for those who are interested only in the quantity. While we create a real following and increase your popularity!"

Instagress comes with a three-day free trial, so it's definitely worth a shot!

However if you want continued use out of this tool its going to cost you \$1.99 for three days, \$4.99 for 10 days or \$9.99 for 30 days. So all in all, not a bad price at all for your automated needs.

First you go ahead and sign up for Instagress and then add your Instagram account to Instagress.

Once you have added your account to Instagress, the dashboard will be displayed, like this below:

The screenshot shows the Instagress dashboard for a user named 'applewatchsweepstakes'. The dashboard is divided into several sections:

- Activity:** Shows 'Stopped' status with a 'Remaining time' of 3 days. A 'Start' button is visible. Below it, a 'Select what you want to do' section has four toggle switches: Likes (checked), Comments (checked), Follows (unchecked), and Unfollows (unchecked). Each has a count of 0. A 'Try our service' box on the right highlights '3 days try for free'.
- Main settings:** A grid of settings including:
 - Activity speed: Normal
 - Media source: Tags (marked as 'New')
 - New media only:
 - Min. likes filter: 0
 - Max. likes filter: 100
 - Don't comment same users:

Auto-stop settings

Likes counter

Comments counter

Follows counter

Unfollows counter

Timer

Now, to keep things as simple as possible all we really need to focus on, is the possibility of getting more likes and followers to our photos and the account. There all we need to do at this point is ensure that 'Likes' and 'Follows' are selected on the tool bar that states 'Select what you want to do'.

Unfollows 0

Now, with regards to the main settings, there isn't really much we need to do, however you may wish to play around with the settings and test out a few variables such as activity speed etc. What we need to do is scroll down to the 'Tags' section.

This section is where you load in a bunch of tags that you would like the software to find photos and profiles to follow and like on your behalf. As you can see the software is already loaded with some of the follow and like related tags so what we need to do, is load a bunch of tags in there that are related to the offer we are attempting to promote.

The image shows a software interface with two main sections. The top section is titled 'Tags' and contains a grid of 60 tag buttons, each with a small 'x' icon. The tags are arranged in 8 rows and 7 columns. The first row includes 'amazing', 'tagsforlikes', 'followme', 'all_shots', 'textgram', 'family', and 'instago'. The second row includes 'igaddict', 'awesome', 'girls', 'instagood', 'bored', 'baby', 'music', 'water', 'bestoftheday', and 'yum'. The third row includes 'flower', 'night', 'instalove', 'jj_forum', 'rolex', 'patek', 'watch', 'wristwatch', and 'patekphilippe'. The fourth row includes 'audemars', 'piguat', 'rolexes', 'applewatch', 'apple', 'beautiful', 'blue', 'red', 'stainless', and 'steel'. The fifth row includes 'time', 'timepiece', 'watchcollecting', 'wwatchoftheday', 'dailywatch', 'yaughtmaster', 'explorer', and 'deepsea'. The sixth row includes 'mywatchblog', 'rolexero', 'read', 'more', 'at', 'photos', 'photogrid', 'photoshoot', and 'photochallenge'. The seventh row includes 'iphone', 'iphonesia', 'iphoneonly', 'iphonegraphy', 'applewatchedition', 'picsart', 'drumonly', and 'vf15'. The eighth row includes 'vf', 'drummer', 'drums', 'life', 'fashion', 'technology', 'newphone', '3dphone', and 'mensfashion'. The ninth row includes 'menstyle', 'mensfashionblogger', 'stylist', and 'supreme'. Below the grid is an empty input field and an 'Add' button. The bottom section is titled 'Auto-stop settings' and contains three input fields: 'Likes counter' with a value of 0, 'Comments counter' with a value of 0, and 'Follows counter' with a value of 0. Each input field has a small 'x' icon and a '+' icon.

OK so I now have my Instagress loaded with a bunch of hash tags I found from various sites relating to apple, apple watch, likes, follows, sweepstakes and a few other random topics to add some interest to the account.

Once we have completed the hash tag steps, we now need to add a bunch of 'comments' to the comments section. These comments will automatically be added to other users photos by the service Instagress onto related photos.

In this section you simply want to add a few different comments, which will entice users to follow, you back. Here are just a few comments I added:

Hey, great photo! Check out my profile!
Love that photo!! Fancy Winning An Apple Watch?!
WOW we both love great things hey? Check me out!
OMG! That is amazing, I love that! Do you want to win?

Once you have inputted the has tags and comments all you have to do is click **START** which is located at the top of the page. As you can see from this image below, I have started the process to get likes and comments.

The screenshot shows a dashboard for 'applewatchsweepstakes'. At the top, there is a navigation bar with links for 'Back to Dashboard', 'Set email', 'Reconnect', 'Log out', 'Activity', 'Profile', and 'Likes'. The main content area is titled 'Activity' and includes a 'Started' status, a 'Remaining time' of 3 days, and a 'Stop' button. Below this, there are controls to 'Select what you want to do' with toggle switches for 'Likes' (checked), 'Comments', 'Follows', and 'Unfollows'. To the right, there is a 'Buy time package' section with three options: 3 days for \$1.99 (\$0.66 per day), 10 days for \$4.99 (\$0.50 per day), and 30 days for \$9.99 (\$0.33 per day). Each option has a 'Buy' button. There are also links for 'How time works?' and 'How to start?'.

At this point, Instagress advise you not to use our Instagram account as this can cause errors in the Instagress progress. Therefore you can use your time wisely and start creating more Instagram accounts and repeating the whole process over and over again.

What Next?

Well its pretty simple, now you need to keep checking your Instagram account and Instagress to see how things are going, with regards to Likes, Comments and of course clicks onto your URL link on your profile.

Remember even though you have the automated process going its always a good idea now and then to pause it and do things manually as sometimes you will find profiles or images you feel would be handy to comment on, or like etc.

Please note that you can pause the Instagress process at any

time, which is pretty handy if you want to save some dollars on the process for a later date.

Time To Ramp Things Up!

Now that you have set up your first Instagram account along with Instagress, its time to ramp things up a little so you could potentially have multiple streams of income, directly from Instagram!

Within a few days you could start to see a lot of clicks on your links and you should also start seeing some CPA commissions coming through. Remember you can choose a wide range of offers. I know some people like to use Instagram purely for \$1 or less offers. I have had success with both \$1 and even offers for \$250-\$300.

If after a few days you haven't had much success, there is a number of things you could do. These include uploading better photos, putting some effects on the photos, better headlines/text and probably more importantly changing the offer you are trying to promote. Remember there is thousands you could choose from. Just go to the sites I highlighted earlier where you can compare offers. For example, the offer I promoted, for the Apple Watch there were thousands I could have chosen. For all I know, a \$1 submit may have worked a lot better.

Once things are going well and steady, you could ramp up the process by engaging with your audience more. Uploading more photos regularly and making more comments across the board and 'liking' more photos. This will help to get more action on your account.

In addition to this, you can start setting up more accounts, possibly in different markets. For example I did the Apple Watch, the next few accounts could be health and fitness, binary and trading, make money online, jobs, kids toys, diet pills, the list could go on.

Remember the best offers that convert with this type of traffic are quiz type offers and basic email submit offers.

If you do start setting up new accounts to ramp this up you must remember to use a brand new email address for every Instagram account. In addition, use a different domain name to re-direct your CPA link. That is very important, hence the need to purchase domain/hosting account through the links provided previously.

If you find a CPA offer that is working well for you, I highly recommend opening multiple Instagram accounts and promoting it across all of them.

Capturing email addresses and building a list

Ok guys, I was a little hesitant about putting this module into the course as I know a lot of fellow Internet marketers cannot be bothered with this addition to the process, however it can be highly profitable.

It's pretty much the same process as highlighted above but with the addition of sending visitors to a custom landing page that you have created before they see the CPA offer. The idea behind this is that it gives you the chance to capture the lead and add them to an auto responder series so you can potentially make money from this lead yourself in the future.

The process is pretty simple and we use Lead Page for this.

Click Here to sign up for lead pages - <http://leadpages.net>

As this is not essential I am not going to speak to much about the process in this guide. I will go over it a lot more in detail in the video course. In short, you will be setting up a landing page inside your Lead Pages account. On that page you will capture the users email address and once the user has clicked submit they will be re-directed to the CPA offer page.

Conclusion

So we have come to the end of the guide. Congratulations on following up to this point and I really hope you can now take action.

To wrap up things lets just go over the basic process again. You need to sign up to Instagram, dress up your profile correctly, upload some photos, find a CPA offer to promote, re-direct it from you hosting account, start the automated process with Instagress = Get Paid.

It really is that simple and the beauty of this is that you can set it up as many times as you wish to, on as many accounts as you think you can handle!

The potential of this is huge. There are so many niches out there, even some which are completely untapped on Instagram. To go with this, there is thousands of CPA offers that match any niche you could think of.

If you need a more detailed insight into the whole process please ensure you watch the video series that accompanies this guide.

If you need any help or advice on setting this up, do not hesitate to contact myself or the team.
